CHEEN WINS OUT ON BIG POINTS

Trustees and Other Respondents File Scathing Answer To Delegate's Many Charges

DISCONTINUANCE BY QUEEN IN TRUST DEED CASE VALID

Jurist Holds Kalanianaole May Press Suit In His Own Name, However

Queen Litinokalani won and Dele gute Jonah Kuhio Kalanianaole loss out in the supreme court yesterday in important points at lasue in the equity suit brought by the Delegate to set as de the trust deed made by the aged Queen in February, 1910. The court held that the presumption

of competency prevailed in favor of the Queen and that she had the right to file a discontinuance of the suit insofar as her name figured in it as a party plaintiff, and as the record show-

ed that she did.
It was further held by the suprem court that the Queen having ceased to be a party to the suit in question. Delegate Kalanianaole being the sole complainant after she had filed her discontinuance, in not entitled to maintain the writ.

'For these reasons," says the de cision of the court, "the temporary writ heretofore issued herein is discharged."

Kalanianaole Left Alone

The status of this case now is as follows: Kulaniansole has a right to maintain and carry on the suit for cancellation of the trust deed against the trustees and others mentioned as milents, but only in his own name this manner the action may go to trial before Circuit Judge Stuart, be fore whom it has been for some time and from whom it was taken up to the supreme court to pass on some of his cortier rulings.

The Delegate filed th's action in the name of the Queen describing him-self as "her next friend," and in his own name. Queen Lilluokalani ap-poluted Judge Antonio Perry as her special counsel and through him filed a discontinuance of the action, claiming that it had been begun without her knowledge or consent.

The supreme court's decision in the

The Court's Findings

The court is prepared to make a ruling in this case upon the phase of the matter as to which the arguments were directed.

"We hold that the presumption of competency prevails in favor of shows she did.

"We bold, however, that the continuance so filed by her was not offectual to discontinue the suit as to the complainant Kalanianaole, as to whose right to maintain the suit in his own behalf the circuit index is not without jurisdiction to determine.

court cannot, therefore, sider that point in this proceeding and it follows that the writ esnaci be maintained. We further hold that the Queen

as a compla nant, had the right to con trol the suit as far as she was con cerned, that her discontinuance was filed as a matter of right, and that it operated of itself to discontinue the suit so far as she was concerned, and that she thereupon and because of

ceased to be a party to the suit. "The statute (R. L. Sec. 2689) pro vides that 'The defendant who applies for this writ shall apply by petition. etc. Assuming that the word 'defend ant' is not to be taken literally, and that under some circumstances a plain tiff may have the writ, nevertheless w are of the opinion that the applicant be a party to the proceeding which it is sought to have restrained 'The Queen having ceased to be a party to the suit in question, Kalanian sole being the sole complainant after she had filed her discontinuance, is no rving on of the business of the estate. Delegate For Himself Alone entitled to maintain the writ.

For these reasons the temporary writ heretofore issued herein is charged."

Le pondents File Answer

There was also filed yesterday in th office of Henry Smith, clerk of the fire circuit court, the answer of the respon dents William O. Smith, Cartle P. Iau ken and Samuel M. Damon, as trustees and of Curtis P. Inukea and John A Cominis, as individual respondents. A reparate answer was filed by other reaccordents to the suit, that is, benefic inries under the terms of Queen Liliuo kalani's trust deed.

The answer filed yesterday, including teapy exhibits attached, cover 123 typeor tten pages. It is signed by the rearondents and attested by their attorneys, Smith, Warren & Sutton.

The answer denies that the Queen al-

ANOTHER BOURBON

Clinton J. Hutchine Said to Have Backing of Congressman Kent For Office

William 4

A new Richmond has entered the gubernatorial field, according to the intest Democratic advices, and he is none other than Clinton J. Hutchins, said to have the backing of the of oneor for the present incumbent of

the executive chamber.

Bumor has it that Mr. Hutchins,
rince his arrival here on matters of rince his arrival here on matters of tusinees, has found time to canvass the situation among the big men of the party and the Territory, looking for encouragement with which to start his campaign. What success he has met with is not related, but he is known to have solleited the opinion of the best informed to that if there is the best informed, so that if there is assurance of backing from here he can come to reside a year and regain his residence which he has lost through a long absence from the Territory.

Mr. Hutchins, who has been inter-exted in the Islands for many years, formerly lived here, being in the in-surance business and is terly was interested in and instrumental in having the present automatic telephone sys-tem insta led in Honolulu.

Since his return to the Islands, Mr. Hutchins has closed several large contracts for the sale of waste molasses of the Hamakun and Hilo plantations to a California vompany, and is now n got ating with several sugar firms for the manufacture of bagusae into containers for the shipment of the pro-

City Engineer and City Attorney's Office Blame Bithulithic Folk For Trouble

LATTER ALSO BEHIND FIGHT ON CONCRETE

This and Other Charges Are Made In Statements By Municipal Officials

The city engineer's office and the city atternty's office are buch consider ably worked up over what they term an attempt to "throw dust in the eyes paving of Lasitann street, by J. A. Gilman, representing bitulithic interests, or his agents in the sidestepping of the facts of the conditions covering the work.

City Engineer Collins and Deputy City Attorney Christy so stated yester-day afternoon in no indefinite language. Mr. Christy said tast evening.

"It appears that a studied attempt is being made to get around the real facts of the bids made on the work for the paving of Lusitana street. The public is, I believe, being lead to think that perat is well known and he claims to it is being done up in the matter of the bave the backing of Congressman K no cost of the work.

Limen Makes No Bid t. A. Giffiian says that he has made offer to do the work at a figure under the estimate of the city engineer. has said nothing that the city could hold hi a bn. He was offered the opportunity with the other contractors to old on the work. He did not do so. After the bids were opened he came into the board with an offer which was not-

to be done under the present board Almost three inches of water fell there have been protests from the property holders that the work as specified the city would not be consented to. unless the specifications were changed so that instead of concrete, bitulithior wa ranite was used; then the property owners would entertain the propo sition ... the improvement but not oth-Ct Willer

Gilman Pack of Protests "His and has delayed the projects as much as any other factor in the work. "As for the statement that Superintendent of Public Works Forbes will not pay for the work in Lusitana street the Territory is charged any more on account of the difference between than the seventeen thousand dollars that the Governor, Forbes and the commissioner of public lands have bound the Territory to pay. I do not think that where an agreement has been made

sum mentioned in the specifications may mean one thing and it may mean another. The proposition made by Gilman in writing, which is on file, was to use as much of the present road surface and existing material now on the street as possible, thereby preventing the tearing up of what is now sound material and using entirely new road metal without any material gain, but increas. ig the cost to the city, the Ter-

ritory and the property owners. This would be only a road surface ing job and not considered permanent Under his guarantee he gets out of having his work inspected as to the material used and the manner of mixing. By putting up a bond for the puarantee, which, by the way, the city would have to pay for, Gilman could give us work that would last quired five years and afterwards the city could whistle.

Would Not Have Specifications The statement that Gilman

produce as permanent a construction with warrenite as provided for in the present specifications for concrete is throw up my position that subsuit to the specifications proposed by Gilman. which were rejected by Forbes and

myself." In the matter of the bids submitted

that she had always maintained the may inherit her entire estate on the storm sewers the specifical to the exclusion of all the persons and tions were expected by the bidders are blood relationship, royal connection of clendship, or other reason, the Queen had always consulted or advised with the Delegate or depended or relied upon bins.

Refragtor At Kaimuki Station Becomes Ineffective As Planet Pulls Further Away

RECORD IN FCBRUARY WAS NOT SATISFACTORY

Twenty-six Drawings and Legend Have Been Forwarded To Harvard Observatory

The physical observations of Mars or the 1916 opposition are rapidly drawing to a close. Not that Mars is invisible-Mare is at present quite a speatacle in his ruddy yellow splendor almost overhead during the early evening; but this earth is rapidly pulling away from Mars and the six inch reractor which has been used for those observations is becoming ineffective at the Kaimuki Observatory.

There has been practically so good seeing for the past week. Even when here is a break in the clouds or wifen the stars seem to be quite bright to the unked eye, the telescope is hindered by a lingering residual baze, so characteristic of Oahu kona weather, and the details of distant planets are sdistinguishable.

Mars Is Drawing Away At present Mars is becoming farth and farther separated from us at ate of almost five hundred and fi teen thousand miles per day. This means a proportionate deer use in the apparent diameter of the disc, so that he surface markings are not only be coming smaller but also growing much Whereas Mars was within sixty-two million miles of this earth at the opposition of February 9, it is now more than seventy million miles way, and its diameter has decreased

rom 14.96 seconds of are to 13.32 seconds of arc. Pebruary Results Irregular The early February observations were quite irregular and unsatisfactory, on account of the unsettled weather. The observations for the latter part if the month have been more consecu-ive and satisfactory, though much good seeing has been lost on account of the distance of the relescope from the residences of the observers. Both Doctor Romberg of the College of Ha-waii and Mr. Midkill of Punahou have made several trips out to the Kaimuki Observatory only to find what promised to be a good sky turn into a bank of clouds or haze. Several small por tions of nights when the sky has been leared for a short time, have been lost on account of the inaccessibility

of the observatory. Iwenty-Six Drawings Made However, during the past month twenty-six drawings have been made, canging from a few quite promising figures to some sketches that are hard ly worth submitting to Doctor Pickering of the Havard Observatory, for whom and in cooperation with whom the observations have been made, These drawings have been arranged, propert colored and covered by legend, and corwarded to Dector Pickering at his Jamaica Obervatory, where he

been stationed during the past Mar-tian opposition. Many Visitors At Observatory The local observers, Doctor Bomberg and Mr. Midkiff have enjoyed baving many parties of visitors at the tele scope during the past month. It's the sincere hope of these men that Hawnli may be served in some worth while scale by these observations, and that something really worth while may grow out of this introductory work on the planet Mark There is every pood reason why in this splendid atmosphere ropical latitude and equable climate there should be a good telescope. With a properly, though not very expensive

equipped observatory, supporting larger glass, much valuable work could be done on the physical observaem and on the southern heavens as well. There is no good glass between San Francisco and New Zealand in the Pacific regions; Pamous Astronomer Gives Advice

A most welcome visitor at the observatory this past month has been Dr. C. L. Doolittle, of the University of Pennsylvania, Doctor Doclittle has been an astronomer for mere than forty years, being, during that time connected with the observatories of Lehigh and the University of Pennsylvania. His visits have been inspirations to those of astronomical inter ests here in Hawali, and it is hoped by the local savants that Doctor Doclittle will continue his interest in as tronomy as it is studied in this latif Indeed, he has already manifosted sufficient interest to consent to d'scussing arrangements and plans for a modern astronomical observatory here in Honolulu. The Benefits of his long

OVERCOME AT BEACH

Sam Hogg, a member of the crew of the Musonia, was overcome at the beach yesterday while swimming. He was assisted to shore by Dike Kahana moku and when on the beach collapsed A hurry call from the Moana hotel brought the ambulance and the man was resuscitated and taken to the marine ward of The Queen's Hospital.
